About Vox Royalty

Vox is a mining-focused royalty and streaming company building a portfolio of royalties and streams across a diverse commodity base. They have a basket of royalties covering precious, base, battery & bulk metals. The portfolio consists of >25 royalties and streams globally, with both cash-flowing and longer-term growth-oriented assets.

About the Butcherbird High Purity Manganese Project

The Butcherbird High Purity Manganese Deposit is a world class manganese resource with current JORC resources in excess of 263 Mt of manganese ore². The Company has completed a robust scoping study with respect to developing the deposit to produce High Purity Manganese Sulphate for lithium ion battery cathodes as well as Electrolytic Manganese Metal for use in certain specialty steels. A PFS is currently being completed and is expected to further confirm the commercial potential of the Project.

The Project straddles the Great Northern Highway and the Goldfields Gas Pipeline providing turnkey logistics and energy solutions. The Company is also intending to integrate renewable energy into the power solution to minimise the carbon intensity of the Project as well as reducing energy costs. A cleaner, lower carbon flowsheet and high penetration renewable energy will place Butcherbird at the forefront of sustainable metal production.
